Firework Compounds

by FarmaQuimia.

Looking after fireworks manufacturer's health and security, Farmaquimia offers safe firework compounds. Our bismuth salts are non toxic and environmental friendly alternatives for the colorful ignition of fireworks and provide brighter and better pyrotechnic effects.

Industrial grade bismuth salts available:

Bismuth Salts	Applications	Advantages
Bismuth Trioxide	Dragon Eggs (Crackling Stars), Gold & Silver Rain, Delay charges	Non toxic, brighter color effects, louder crackling sound
Bismuth Subnitrate	Dragon Eggs (Crackling Stars) , Gold & Silver Rain, Distress Signals	Non toxic, brighter color effects, louder crackling sound
Bismuth Subcarbonate	Alternative to bismuth trioxide	Non toxic, brighter color effects, louder crackling sound
Bismuth Subsalcylate	Whistle mix, non hygroscopic additive for Fuses	Non hygroscopic. Water resistant. Non toxic.
