# WHITE SILVER POWDER

## *Cosmetic Pearlescent Pigments*

by FarmaQuimia.

White Silver Powders are pure bismuth oxychloride pigments that impart a rich satiny luster, excellent covering power, soft-creamy feel in the skin, and optimal compressibility and binding characteristics to cosmetics.

White Silver Powders' soft optical effects help to gently defuse ambient light helping to minimize the appearance of fine lines and wrinkles.

White Silver Powders are available in a variety of particle sizes and bulk densities, for a variety of pearlescent effects. They are particularly well-suited for long-wearing product applications. There are either UV stable (UVS) or UV completely resistant grades (UCR).

Bismuth Oxychloride White Silver Powders can be used for anhydrous cosmetics such as Pressed Powders, Eye Shadows, Mineral Makeup, Lipsticks, Flushes, etc.

Due to the soft-creamy feel Bismuth Oxychloride can give to the skin, it can be also used in Personal Care formulations such as Deodorants, Body Creams, Soaps, etc.

Name	Size	Composition
BIOCLOP	5-50 µm	BiOCl
BIOCLOP UVS	5-20 µm	BiOCl
PEARL 1015 UCR	1-20 µm	BiOCl
PEARL 1015 UVS	10-80 µm	BiOCl
PEARL 2600 UVS	20-100 µm	BiOCl
PEARL 2610 UVS	2-10 µm	BiOCl
PEARL B601	1-50 µm	BiOCl
PEARL B701	1-20 µm	BiOCl
PEARL I	5-50 µm	BiOCl
PEARL I UCR	5-20 µm	BiOCl
PEARL II	1-20 µm	BiOCl
PEARL II UCR	10-80 µm	BiOCl
PEARL SUPREME UCR	20-100 µm	BiOCl
PEARL SUPREME UVS	20-100 µm	BiOCl
SATIN B UCR	20-100 µm	BiOCl
SATIN B UVS	20-100 µm	BiOCl
